Shivani Kiran Kamtikar

shivanikamtikar.github.io | +1 (217) 721-3469 | skk7@illinois.edu

EDUCATION

University of Illinois at Urbana Champaign   **Champaign, IL**
Ph.D. Computer Science, Advisor - Prof. Girish Chowdhary   *Expected May 2026*
○   Relevant coursework: Robot Learning | Meta Learning | Transfer Learning
Master of Science in Computer Science (MSCS), Advisor - Prof. Girish Chowdhary   *May 2022*
○   Relevant coursework: Learning-Based Robotics | Computer Vision | Robotics and Automation | Machine Learning

Savitribai Phule Pune University   **Pune, India**
Bachelor of Technology in Information Technology   *August 2020*
○   Relevant coursework: Machine learning | Artificial Intelligence

PUBLICATIONS

Conference/Journal
- **S. K. Kamtikar**, S. Marri, B. T. Walt, N. K. Uppalapati, G. Krishnan, and G. Chowdhary, *"Visual servoing for pose control of soft continuum arm in a structured environment"*, IEEE Robotics and Automation Letters (RA-L), and IEEE International Conference on Soft Robotics (RoboSoft) 2022 - **oral presentation**.
- K. Koe, S. Marri, B. Walt, **S. K. Kamtikar**, N. K. Uppalpati, G. Krishnan, G. Chowdhary, *"Model-Based Dynamic Position and Orientation Control of a Hybrid Soft Continuum Manipulator"*, under review.
- K. Koe, P. K. Shah, B. Walt, J. Westphal, S. Marri, **S. K. Kamtikar**, N. K. Uppalapati, G. Krishnan, G. Chowdhary, *"Detect2Grasp: Integrating Global and Local Visual Perception for Berry Manipulation with Low Cost Robots"*, under review.

Workshop
- **S. K. Kamtikar**, K. Koe, S. Marri, B. Walt, N. K. Uppalpati, G. Krishnan, G. Chowdhary, *"Visual Servoing for Pose Control of Hybrid Continuum Manipulator in an Unstructured Environment"*, CoRL 2023 Workshop on Learning for Soft Robots.
- **S. K. Kamtikar**, E. Ji, N. K. Uppalapati, G. Krishnan, and G. Chowdhary, *"Realistic Simulation Environments to Achieve Visual Servoing on Soft Continuum Arms in Constrained Environments"* - Fourth International Workshop on Machine Learning for Cyber-Agricultural Systems (MLCAS) 2022.
- **S. K. Kamtikar**, S. Marri, B. T. Walt, N. K. Uppalapati, G. Krishnan, and G. Chowdhary, *"Towards Autonomous Berry Harvesting using Visual Servoing of Soft Continuum Arm"* - AI for Agriculture and Food Systems (AIAFS) workshop 2022.

RESEARCH EXPERIENCE

Graduate Research Assistant, University of Illinois – Urbana Champaign   2021 - Present

Learning-Based Manipulation of Soft Robotic Arms in a Structured Environment
- Developed a novel deep neural network-based method for robust 3D positioning of soft robotic arms using vision
- Developed a network to predict controls required for desired target poses, leveraging visual feedback from a camera mounted at the distal end of the arm
- Devised a proportional control law that utilizes visual feedback to minimize the error between desired and current poses
- Demonstrated the model's transferability to new environments with minimal effort, showcasing an adaptable and scalable robotic system
- Achieved state-of-the-art performance in manipulation of soft robotic arms with translation error less than 2 cm and rotation error less than 0.25 rad

3D Vision-Guided Autonomous Manipulation of Soft Robots in Cluttered, Unstructured Environments
- Developed a comprehensive solution utilizing Structure-from-Motion (SfM)-based 3D reconstruction for producing detailed point clouds of complex scenes
- Initiated reconstruction using imagery from a low-cost, low-quality tip-mounted camera collected through random exploration at its starting position
- Refined the reconstruction process in real-time to enhance accuracy and detail as the robot moves towards the target
- Implemented a graph-based path-planning method for effective navigation around obstacles and generating optimal paths

Visual Servoing for Hybrid Manipulators: Bridging Quasi-Static and Dynamic Control in Cluttered Environments
- Developed a novel visual servoing approach for hybrid continuum manipulators by integrating dynamic and quasi-static control for balanced speed and precision
- Employed an optical-flow based model coupled with a pose predictor model for precise end-effector positioning
- Demonstrated manipulation in unstructured environments, pivotal in sectors like agriculture for autonomous harvesting

ACADEMIC PROJECTS

End-to-End Goal Based Meta-Learning For Robotic Applications
- Implemented an RL-based method that combines end-to-end application feedback and meta-learning for manipulation tasks
- Used REINFORCE method for policy update of the RL system

Reinforcement Learning for Manipulation and Control in a Structured Environment
- Trained a Deep Deterministic Policy Gradient (DDPG) model for tracking the path of the end effector to a target using real-world data
- Conducted ablation studies to identify optimal parameters for the DDPG model
- Explored the shortcomings of DDPG through systematic experiments and compared it to other learning-based pose-estimation methods

TECHNICAL SKILLS

Topics: Deep learning, 3D reconstruction, SLAM, 3D vision-guided manipulation, image segmentation, object detection, reinforcement learning, soft robotics

Programming Languages and frameworks: Proficient in Python (and deep learning libraries like PyTorch) and have experience with ROS

CONFERENCE/JOURNAL REVIEWER

[IEEE Robotics and Automation Letters (RA-L)](#)

[Workshop on Agricultural Robotics for a Sustainable Future, IROS](#)

LEADERSHIP EXPERIENCE
- Member of the Engineering Graduate Student Advisory Council ([EGSAC](#)), UIUC - 2023-2024
- General Chair for [CSL Student Conference 2024](#)
- Treasurer for [GradSWE](#) (Graduate Society of Women Engineers) at UIUC - 2021-2024.
- Robotics Chair for CSL Student Conference 2023
- Diversity Advocate for a hiring committee at UIUC.
